Notes to this table of monitoring assignments:

All stations in this plan are encouraged, but are not required, to also monitor the appropriate NOAA Weather Service facility in their area. NOAA weather facilities are outlined elsewhere in the New Mexico State EAS Plan.

A part of southeastern New Mexico is jointly in the El Paso, Texas operational area. Monitoring assignments above reflect the reality that a common threat to the public is likely to be issued from El Paso alerting agencies. Accordingly, stations in Las Cruces and Silver City and surrounding areas have the monitoring designations specified above, and are requested to monitor KLYT-FM via translator as outlined in the following paragraph.

All stations in the New Mexico EAS areas are requested, but not required, unless it is specified in one of the two mandatory monitoring assignment columns, to monitor Albuquerque station KLYT-FM via translator or cable in addition to any other monitoring assignment(s) shown in this list. Stations in the **Silver City EAS** area are jointly a part of the New Mexico and the Texas (El Paso) EAS areas, and as such are required to monitor KLYT-FM via translator as one of their primary monitoring assignments as reflected in the table above. As of March 1, 2001, KLYT-FM currently delivers its signal to the following communities on the following frequencies. KLYT-FM has agreed to carry activations for areas it serves by translator.

| Community | Frequency | Community | Frequency |
|------------------|------------------|------------------|------------------|
| Alamogordo | 88.1 | Las Vegas | 92.9 |
| Artesia | 91.5 | Portales | 93.5 |
| Roswell | 97.9 | Hobbs | 90.1 |
| Clovis | 88.1 | Grants | 96.7 |
| Las Cruces | 88.1 | San Antonio Mtn | 102.7 |
| Ruidoso | 91.9 | | |
| T or C | 91.1 | | |
| Silver City | 90.3 | | |

When the EAS system was created station participation level designations have been carried over from the then most recently available EBS FCC Mapbook. Based on changes that may take place from time to time in the assignments of monitored stations, the participation level designations for some stations may change from time to time as well.
